College

What are T Levels?

T Levels are a new technical qualification that will replace existing vocational qualifications, which have been developed in collaboration with employers and businesses. T Levels will offer students a mixture of classroom learning and 'on-the-job' experience over the duration of an Industry Placement.

What are Industry Placements?

Industry Placements comprise of a student, on a course relevant to your business, spending a minimum of 315 hours, typically completed across 45 days. This will give students the opportunity to put the skills and knowledge that they have learnt in the classroom into practice in the workplace.

What do I need to do?

- Provide a 315 hours minimum Industry Placement, typically completed across 45 days for a student on a relevant course.
- Ensure there is a safe work environment and opportunities for the student to develop their technical skills within your industry.
- Provide a mentor for the student.
- Complete a workplace induction and set a work plan for the student.

How will taking a student on placement benefit my business?

As an employer you will benefit in a number of ways from integrating T Level Industry Placements into your business, including:

Bring new ideas, talent and perspective

Raising community profile

Additional resources at no extra cost

Mentoring opportunities for current employees

Building the skills and capacity of your business

Influencing the quality of future employees

Influencing career choices
