Industry Expert Teaching

Learner Centred

Software Development

This qualification was developed in consultation with industry experts and is awarded by Gateway Qualifications to ensure its relevance to roles in the tech sector.

This qualification will:
- **Prepare learners to progress to a higher level qualification in the same sector**
- **Provide additional skills to those working in tech-adjacent roles**
- **Prepare learners for employment in the digital, creative and other industries where they can develop their technical skills further**
- **Provide additional skills to enhance learner apprenticeships.**

Duration
1 year

Price
£2,583

Learning Method
This course is delivered through an online learning platform which is accessible 24/7. The platform not only provides course content, it also has career support, peer-to-peer community support, learner analytics to track progress, etc.

What will I learn?
The course comprises the following units:
- Project Management
- Programming Implementation
- JavaScript
- Robot Technology
- Maths for Computing
- Software Testing
- Object Oriented Programming

Each module is completed with a summative assessment which tests the learner's understanding of the material covered and their ability to apply it in a real world setting. The assessments are baked-into the programme, learners submit their assessment to the college for evaluation.

Entry Requirements
You will be required to undergo a coding challenge issued by The Code Institute and would need to score a minimum of 70% in order to enrol on the course.

Course units

Project Management

JavaScript

Software Testing
